

Mission Statement

Sage offers every one of its residents an **individual and unique** experience of care, based upon the **Jewish culture** and way of life.

We are committed to a **highly professional approach** from all of our **team members** to create the very best quality of life we can give to our residents.

We welcome the views and opinions of the **families** who trust us with the care of their loved ones and see them as an essential part of the caring process.

Our aim is to provide a **safe and loving home from home** for everyone who lives with us, in which their needs are met, and their dignity, safety and security are protected and enhanced on a daily basis.

We will maintain **excellent relationships with other professionals** in our area to ensure that we access all the services our residents may require.

We recognise the challenges that meeting such high standards present to **our team**. To help them do so, we will provide them with individual and group **support**, professional training and development, clear expectations, and thoughtful, effective, and responsive leadership.

We will strive to create the very best experience we can for every one of the people who live, work, or trust us with the care of their loved ones here at Sage.
